DATE :

To implement CI/CD using Jenkins and to deploy a Student Portal website

Aim

To implement the CI/CD using the Jenkins and to deploy a Student Portal Website to a live server using Vercel.

Tools required

- Jenkins
- Github
- Git
- Vercel

Procedure

Step 1: Create Project Folder

Create a new folder named NM-Project on your system.

Step 2: Create Files

Inside the folder, create the HTML,CSS,JS files .

Step 4: Create GitHub Repository

Go to GitHub and create a new repository named:my-website-project.

Step 5: Push Code to GitHub

Open Command Prompt inside your project folder and execute the following commands:

- `git init`
- `git add .`
- `git commit -m "first commit"`
- `git remote add origin https://github.com/Bavana-N/my-website-project.git`

- `git branch -M main`
- `git push -u origin main`

Step 6: Install and Open Jenkins

Install Jenkins and open the Jenkins Dashboard in your browser.

Step 7: Create New Jenkins Pipeline

- Click on New Item
- Enter name: my-website-project
- Select Pipeline
- Click OK

Step 8: Configure Pipeline Script

Scroll to the Pipeline section and paste the following script:

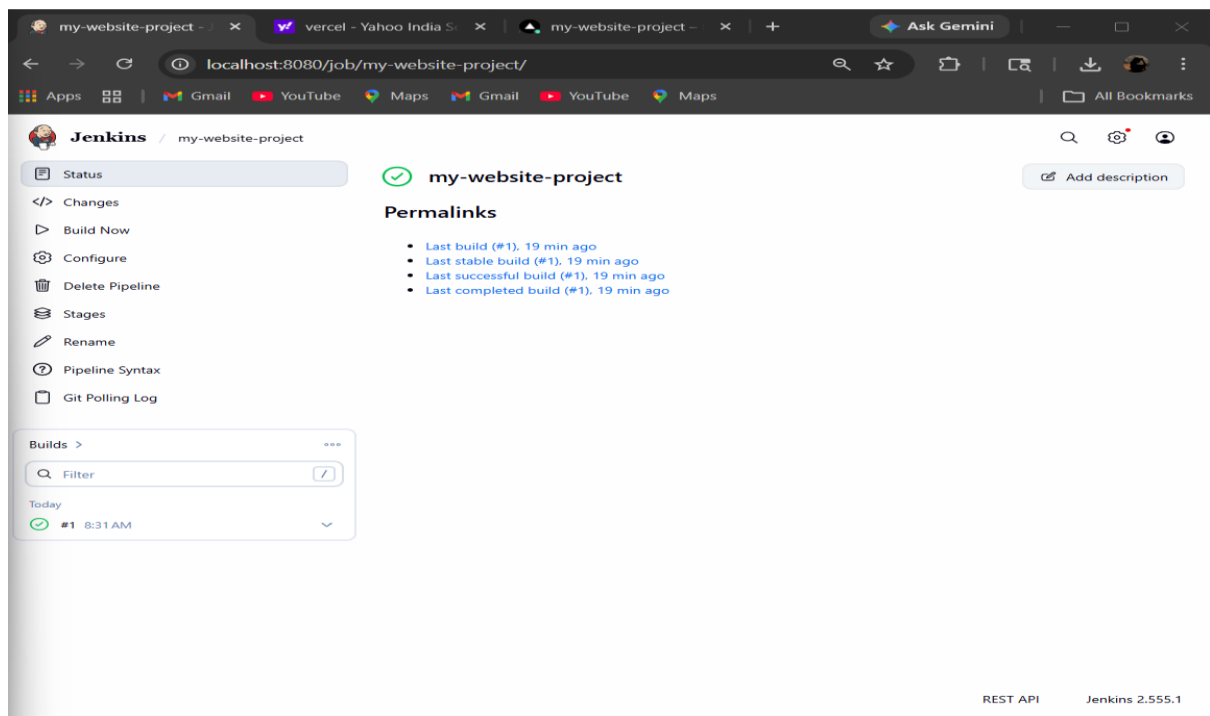

```
pipeline {
  agent any
  stages {
    stage('Clone') {
      steps {
        git 'https://github.com/Bavana-N/my-website-project.git'
      }
    }
    stage('Build') {
      steps {
        echo 'Static website - no build needed'
      }
    }
    stage('Deploy') {
      steps {
        echo 'Deployment handled by Vercel'
```

```
}  
}  
}  
}
```

Click Save.

Step 9: Enable Auto CI/CD Trigger

- Go to Build Triggers
- Enable Poll SCM
- In the schedule box, type: * * * * *
- Click Save

Step 10: Deploy Using Vercel

- Open Vercel
- Click Add New → Project
- Import the GitHub repository my-website-project
- Click Deploy

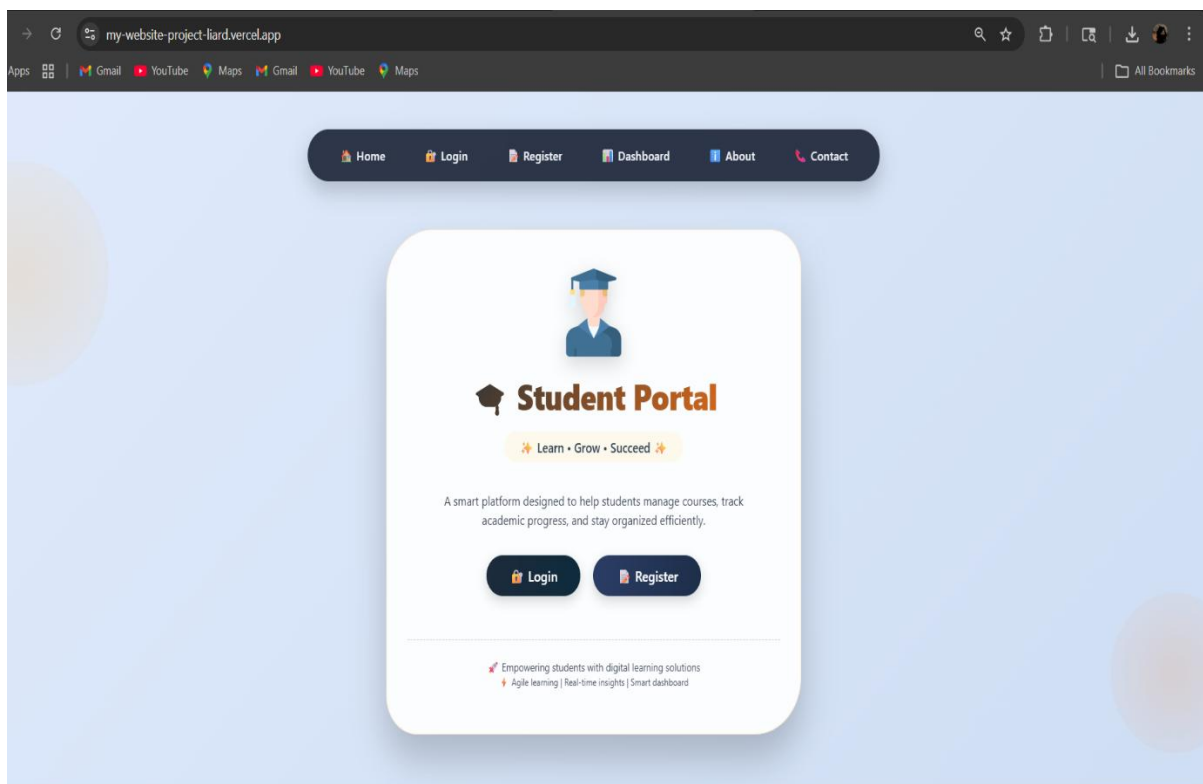

Step 11: Automatic Deployment

Vercel will:

- Pull the code from GitHub
- Build and deploy the project
- Generate a live URL

Example:

<https://my-website-project-liard.vercel.app/>

Step 12: Update Project (CI/CD Testing)

Make changes to your website (e.g., change heading from Student Portal to Notice Board).

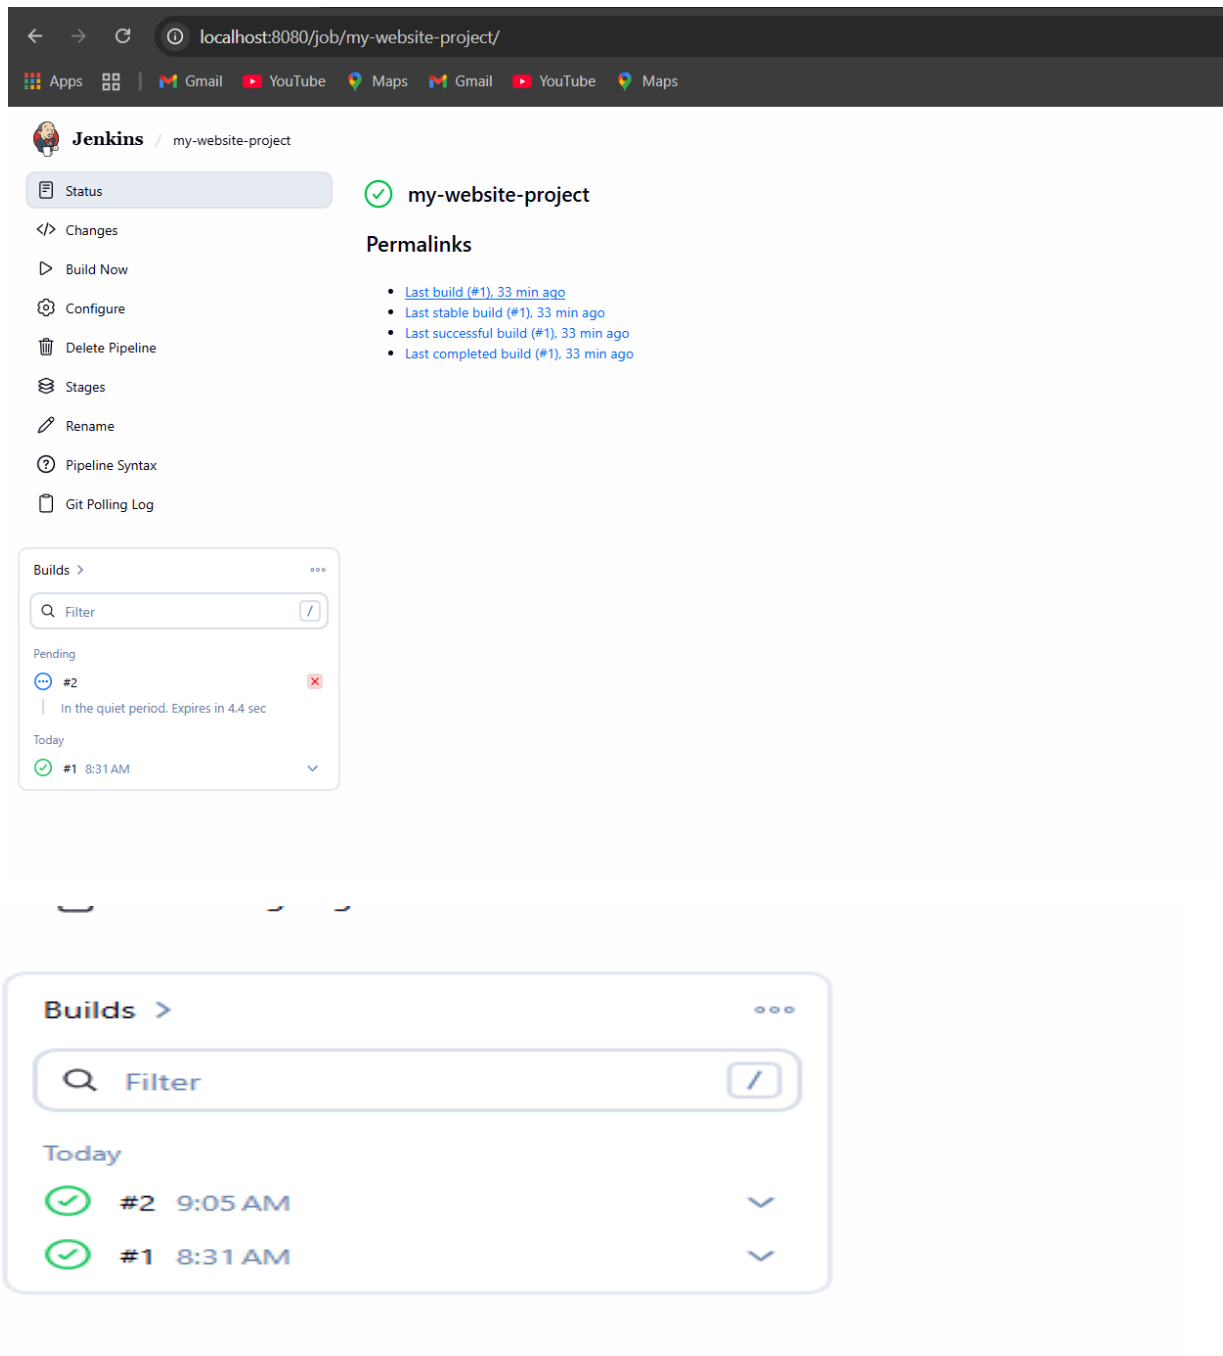

Step 13: Push Updated Code

Run the following commands:

```
git add .
```

```
git commit -m "test1"
```

```
git push
```

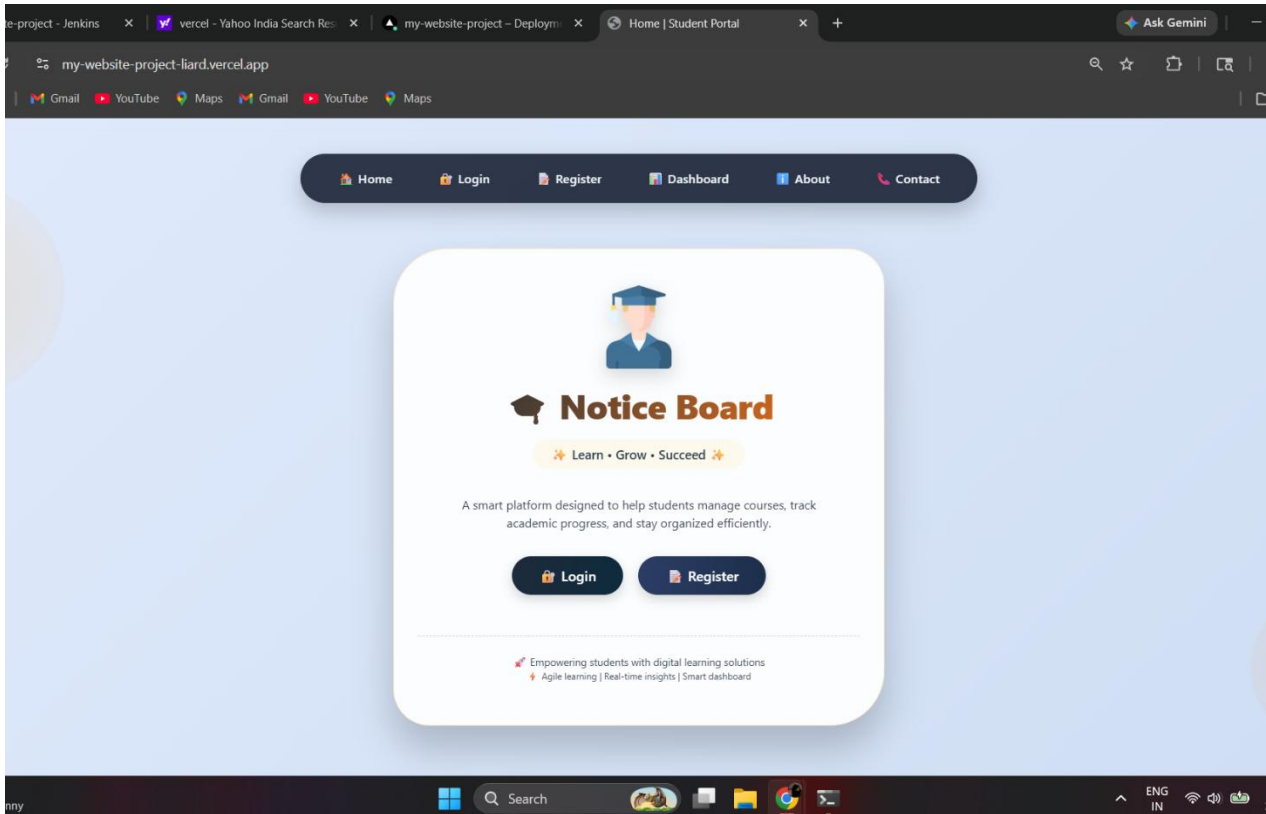

Step 14: Automatic Pipeline Execution

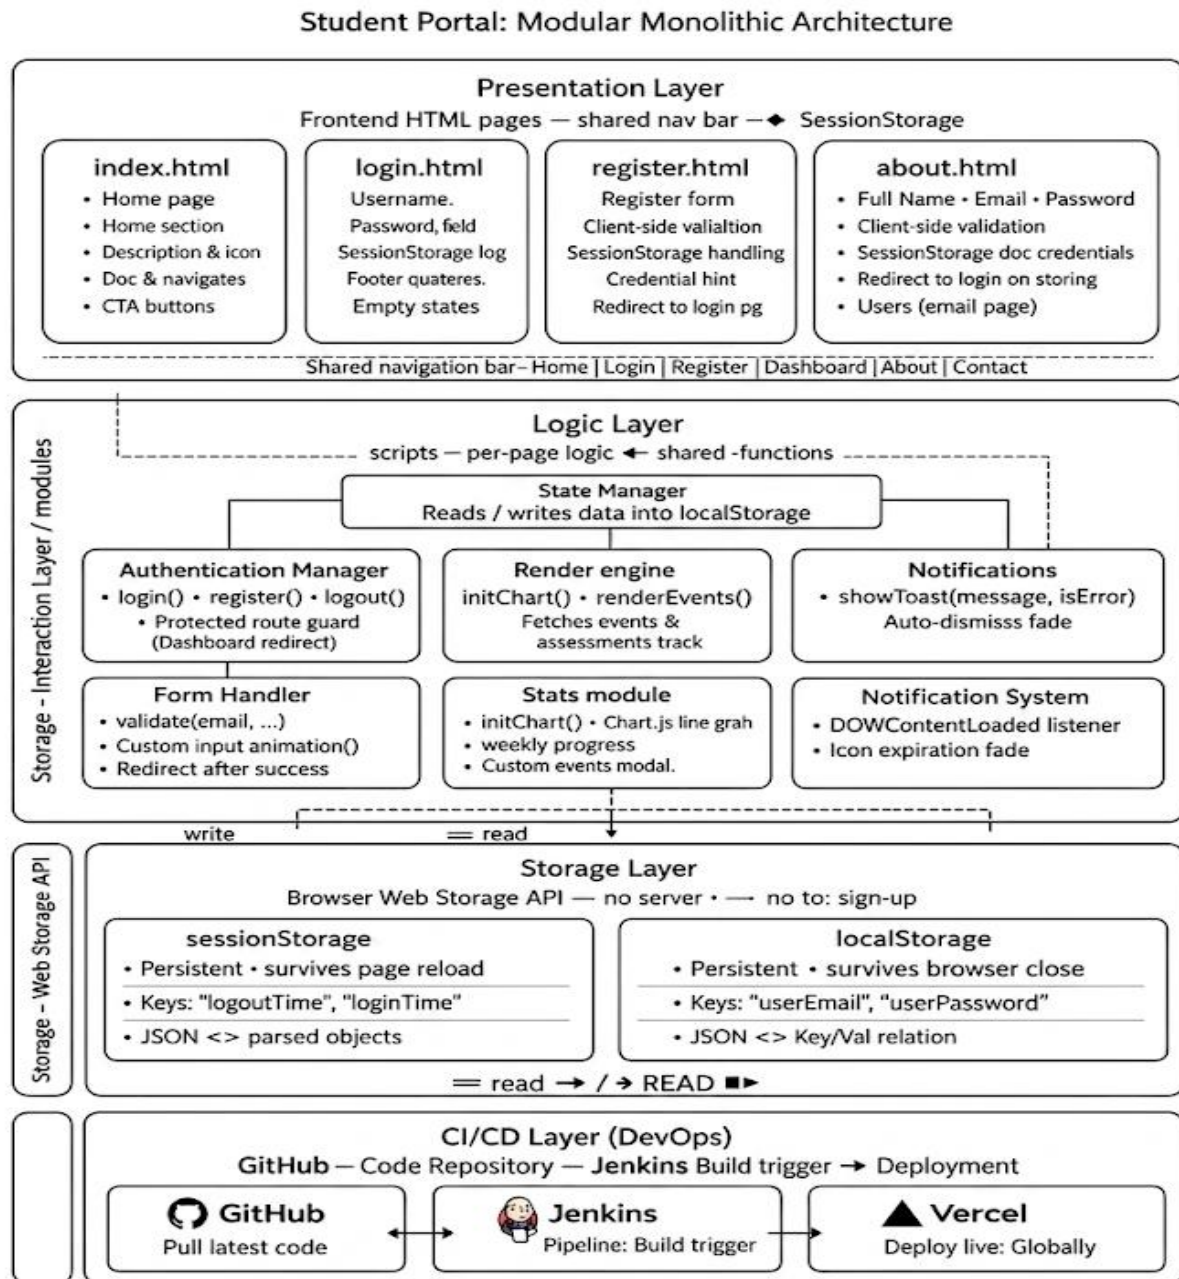

- Jenkins detects changes via Poll SCM
- Pipeline runs automatically
- Vercel redeploys the updated project

Step 15: Verify Deployment

Refresh the Vercel URL to see the updated changes reflected live.

Conclusion

Thus, the implementation of Continuous Integration and Continuous Deployment (CI/CD) using Jenkins was successfully completed. The static website was deployed using Vercel and made available to users through a live URL. The process ensured automation in building and deployment, reducing manual effort and improving efficiency. Additionally, relevant certifications from Infosys Springboard were completed and documented as part of the learning process.
